Professional Summary

Motivated machine learning enthusiast with hands-on experience in building and training ML models. Strong foundation in Python and backend development with the ability to solve real-world problems. Eager to apply technical skills and grow in a dynamic, fast-paced environment.

Skills

Python Developer, Backend Developer, Machine Learning Algorithms, Data Preprocessing, Model Training

Experience

Intern – Big Bucks Private Limited Company

- Worked on machine learning workflows including data cleaning and model building.
- Built a resume-based ML project, handling dataset preparation and model implementation.

Projects

Machine Learning Resume Project – Designed and implemented a model to analyze resumes and extract insights.

Education

B.Tech AI & DS, Panimalar Engineering College (2027)
